3 PERMANENT EXHIBITIONS

CYCLES 1 & 2

Human

You're the hero of this exhibit

You are the result of millions of years of transformation. Thanks to this interactive exhibition discover your place along human evolution, understand what makes you unique and catch a glimpse of what we might become in the future.

CYCLES 1 & 2

Fabrik

Creativity Factory

Enter a creative workshop space where imagination is your most important tool. Follow the technological design approach and find an original solution to the challenge thrown to you. Prototype and test your invention, here, one is entitled to make mistakes.

CYCLE 1

Science 26

Experience Science from A to Z

Every letter of the alphabet is matched with a scientific concept students can explore through a variety of activities and experiments.

GET THE SCOOP!

We are preparing to welcome a new feature exhibition perfect for your students. Stay tuned for news and invitations for our special events! Subscribe to our exclusive school newsletter.

3 EDUCATIONAL PROGRAMS

Developed using the MEES's progression of learning approach and animated by an educator. Explore more photos and videos at MontrealScienceCentre.com

CYCLES 1 & 2

The Great Debaters: The stars and me

Development of critical thinking and the ability to debate
ST, FRE, ENG, ERC

In the era of viral news, invite your students to compare their opinions in an interactive formula that revisits the traditional debate! They will have to navigate through science and pseudoscience information banks where they will learn how to properly build and choose their arguments. Ideas clash and the crowd votes, who will prevail? An exciting way to sharpen minds of future enlightened citizens.

SECONDARY 3

Shock Wave

In connection with Earth and Space.

Plate tectonics affects the Earth and humankind. Take on the challenge of creating an earthquake-proof structure. Will it withstand the shockwave when it is put to the test?

QSP Connection

Qualities, Skills, and Preferences
Per the guidance-oriented approach

A game where every student contributes their abilities to erect an earthquake-resistant tower. An opportunity for students to discover useful science and technology skills and improve their self-knowledge.

A TURNKEY OUTING

- Outing planning assistance
- Greeting of your group at arrival
- Animation by specially trained educators
- Free and easy access for buses
- Free lunch area available
