

FEATURE EXHIBITION

T. REX: THE ULTIMATE PREDATOR

Come meet the tyrannosaurus superfamily in this new interactive exhibition! Discover the anatomy and sensory capabilities that helped this superpredator dominate all the competition and get up close and personal with the most scientifically accurate representation of a *T. rex*!

Five (5) life-sized dinosaur reconstructions, about 20 interactive stations, and more than 40 models and casts to help you explore how *T. rex* grew from a hatchling into a full-grown adult. Featuring mechanical and digital games as well as fossils to observe and touch, alongside a shadow theatre and animated wall projections.

6+ Recommended for visitors ages six (6) and up.

Helpful Notes for Visit Companions:

The exhibition hall features a single entry point and one exit point. The exhibition path runs across three (3) rooms. You can exit at any time by going back on your steps. The exhibition does not feature any room dividers which allows for good visibility into each of the three (3) rooms.

The five (5) life-sized dinosaurs do not move or make any noise, but their shadows sometimes come to life and move.

The exhibition hall can become noisy when there is a crowd. Noise-cancelling earmuffs are available on loan at the ticket counter. Quantities are limited.
