

FEATURED EXHIBIT

HOCKEY: Faster Than Ever

An exhibit that invites youngsters to discover various facets of the history and science of ice hockey, before being able to test their skills in the Hockey Lab!

More than thirty interactives allowing young and old to get into the action and understand the scientific concepts and innovations behind ice hockey. Several video simulations and archival footage are featured.

The Hockey Lab area can be noisy if the exhibit is busy. Noise-canceling shells are available at the ticket office. Limited quantities.

6+ Recommended for children 6 years and older. Most of the interactives are accessible to visitors with reduced mobility.

Notes for the companions

The room has only one entry and one exit. The exhibit is divided into 6 zones. You can go out at any time by retracing your steps.

The partitions are quite numerous, so you can't always follow the visitors you are accompanying.

The exhibition room is dimmed. There is no natural light in the room. The colors red and white are predominant in the exhibition.
